Worksheet #4: jQuery effects

Using: $.fadeIn(), $.fadeOut(), $.hide(), $.show(), $.slideUp(), $.slideDown()

- Let's pick a Turkey image from Google
- Let's create the following HTML in neocities: **effects.html**

```
<html>
    <img class="turkey" src=
    "http://thumbs.dreamstime.com/z/turkey-dancing-12473882.jpg" />
    <script src="http://code.jquery.com/jquery-1.11.1.js"></script>
    <script>
        // … TYPE in your code here!
    </script>
</html>
```

- Open the Javascript console and type the following:

```
$(".turkey").slideUp();
$(".turkey").slideDown();
$(".turkey").fadeOut();
$(".turkey").fadeIn();
$(".turkey").hide();
$(".turkey").show();
```

- Final code is like the following:

```
<html>

<img class="turkey" src=
"http://thumbs.dreamstime.com/z/turkey-dancing-12473882.jpg"
width="200"/>

 <script src="http://code.jquery.com/jquery-1.11.1.js"></script>

<script>
// … TYPE in your code here!
$(".turkey").slideUp();
$(".turkey").slideDown();
$(".turkey").fadeOut();
$(".turkey").fadeIn();
$(".turkey").hide();
$(".turkey").show();

</script>
</html>
```
